

Missouri Boating Statistics & Drownings

**2015
Edition**

**2014
Statistics**

**Department of Public Safety
Missouri State Highway Patrol**

Introduction

This booklet is published by the Missouri State Highway Patrol as an aid to persons who are interested in recreational boating crashes and accidental drowning incidents occurring in the state. It contains information which provides a comprehensive look at statewide crashes and accidental drowning incidents as experienced in 2014.

The Missouri State Highway Patrol is the central recreational boating data collection agency for the State of Missouri. The Patrol investigates all recreational boating crashes occurring in the state and either investigates or gathers data on accidental drowning incidents occurring in state and private waters.

Interesting Statistics

Here at a glance are some interesting statistics found in this booklet:

- In 2014 there were 15 persons killed and 103 persons injured in recreational boating crashes in the State of Missouri. This was two fewer killed and 15 more injured than in 2013. There was an increase of 28% in total crashes statewide compared to 2013.
- In 2014 there were 179 total crashes including 83 property damage only, 82 injury, and 14 fatal.
- "Inattention" was the leading contributing circumstance for all crashes followed by "water conditions (rough, chop, current, etc.)." Impairment (alcohol/drugs) was known to have been a contributing circumstance to 17 crashes statewide.
- Capsizing type crashes resulted in the deaths of three persons. This was 20% of the total persons killed in crashes.
- Of all crashes reported statewide, 86% (154) occurred during the months of May through August.
- Most crashes occurred on Friday (35) and Saturday (60) and most occurred between noon and 8:00 p.m.
- Of all crashes reported statewide, 70.4% (126) involved only one watercraft. Twelve of the 14 fatal crashes involved only one watercraft.
- Of the 233 boat operators involved in crashes, 127 had no prior boater education.
- In 2014, there were 21 persons killed in accidental drowning incidents occurring in state waters, 14 fewer than in 2013. In addition, the Missouri State Highway Patrol investigated seven accidental drowning incidents that occurred on private property.
- Most drowning incidents occurred on Friday (6), Saturday (5), and Sunday (6) and most occurred during the months of June (12) and July (8).

It is hoped that the information in this booklet will be of value to you. Certainly it is the most comprehensive look available at statewide crashes and accidental drowning incidents in Missouri.

Alcohol Involvement

Drinking and Crashes - Whether or not a person has been drinking cannot always be determined at the scene of a crash. It is generally impossible to determine the persons who have had one or a few drinks; yet, these individuals may be as much of a hazard as the obvious drunk. Because of the time lapse from the moment of occurrence until an officer arrives at the scene to make the investigation, a person's condition concerning drinking can change a great deal. In cases where the individual may have been removed to a hospital, doctor's office or funeral home, his condition may never be determined.
